

## From Tieland to Tiewan (Microcontrolling the Skys)

Venue: **Delft, Nederland**

Date: **19.05.2014 - 26.05.2014**

Organizer: **LC Delft**

Participant: **Abdullah Ansari**

Sponsors: **European Wind Energy Master, EEMCS  
Faculty of TU Delft**

“All the time work and no play make Jack a Dull boy” and that’s the saying the workshop went against. Delft, the city of Social Inhabitants and students (Most of them from TU Delft) was for me a very new and refreshing experience as I was visiting it for the first time. I would say it changed my perspective that “Being Social Doesn’t do good to ones personality” as the event ( organized by LC Delft for EESTECERS) helped me a lot in learning Practical things related to my field (Embedded Systems),being open and social.

One of the Most Enriching and character Polishing Week of my life started on 19th May, 2014 with very warm welcome from Organizers ( LC Delfts) in a seductive manner as I was surprised to see a Limo to pick me up from trainstation to TU Delfts Campus of Electrical and Computer Engineering to the office of ETV (Elektrotechnik Vereinigung) which is the student Organization.

During the workshop, we worked in groups where I came across different problem solving techniques from participants as all of them were from different cultures and Universities. This Microcontroller Part (Designing Application software on Quadrupter) lasted for 3 days and then It was Wind Energy Workshop on Friday, where we learned to design blades which rotates over the big rod and converts wind energy to electrical energy, each of the group designed its own set of wind energy system and then we competed among each other. The design that generated more current, won the competition.

In nutshell, it was one of the most enjoyable weeks of life for all of us. We enjoyed every minute of it, Cities like Rotterdam, Den Haag, Leiden and the mighty Amsterdam, Different Games we played, waiting for Shower at hostel and many more in my heart. In the end We didn't say good bye to Each other in the hope that we might meet each other in some future event.
